

Brand : 3M

3M 02600

Size : 114*139mm

Material: Sponges, Aluminum Oxide

Application : Various models, hardware electronics, furniture, plastics, mobile phone shells, etc.

Brand : 3M

3M 407Q

Size : 9*11inch

Material: Silicon Carbide

Application : Wooden musical instrument manufacturing, woodworking machine furniture manufacturing, casting and injection molding industries; Automobile and parts processing, metal processing, aviation materials, plastic parts polishing; Jewelry and jade processing, bracelet polishing, bodhi polishing, amber polishing.

NO.2 Sanding Paper Sheet

Brand : 3M

3M

Size : 230mm*280mm

Material: Silicon Carbide

Application : Used for light to heavy sanding, shaping and finishing on materials such as lacquers, paint, body fillers, glass, metal, plastic, stone and marble.

Brand : 3M

3M 734

Size : 230mm*280mm

Material: Silicon Carbide

Application : Used for light to heavy sanding, shaping and finishing on materials such as lacquers, paint, body fillers, glass, metal, plastic, stone and marble.

Brand : 3M

3M 216U

Size : 230X280mm 9X11 inch

Material: Aluminium oxide and ceramic alumina abrasive, Velcro/PSA backing, anti-clogging super coating

Application : Widely used in the grinding and polishing of artificial stone, jade stone, home decoration, jewelry, furniture and wood products, metals, automobiles and other items.

Brand Norton

Norton A275

Material: Aluminum Oxide

Size : 9*11inch/230*280mm

Application : Perfect for handling every kind of odd jobs and little fixes, like automotive sanding, wood furniture finishing, wood turning finishing, metal finishing, lacquer/ porcelain / plastics/ glass/ stone/ leather polishing and more

Brand : 3M

3M 255P

Size:9"*11"

Material: Aluminum Oxide

Usage : Primer polishing, paint finish polishing; putty polishing; metal processing, rust removal. Grinding and polishing of wood and synthetic materials.

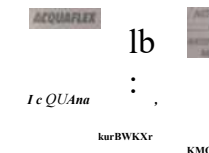

Brand Norton

Norton H425

Material: silicon carbide abrasive; waterproof E-wt backing;

Size : 9*11inch

Benefits : Superior Life, fast cut rate, consistent finish; Fast cutting with excellent finish in wet applications;

Brand : 3M

3M 401Q

Size(mm) : 230mm x 140mm

Material: Silicon carbide

Application : mllsed for light to heavy sanding, shaping and finishing on materials such as lacquers, paint, body fillers, glass, metal, plastic, stone and marble.

Brand Norton

Norton T483

Size : 9*11inch 230*280mm

Material: Silicon Carbide

Application : Grinding and polishing: wood, stone, stainless steel, iron, aluminum alloy, copper and other metals, widely used, simple and convenient

Brand Name : Deerfos

Deerfos ACM 66

Material: Silicon Carbide

Size : 9" x 11" (230mm x 280mm)

Application : for wood, paints, lacquer, furniture, instrument, plastics, etc.

Brand :Deerfos

Deerfos CC768

Material : Silicon Carbide

Size : 230mm x 280mm 9x11inch

Application : for wood, paints, lacquer, furniture, instrument, plastics, etc.

Brand : OEM

OEM Kraft paper

Material: Silicone Carbide

Size:9"*11"

Application : Perfect for handling every kind of odd jobs and little fixes, like automotive sanding, wood furniture finishing, wood turning finishing, metal finishing, lacquer/ porcelain / plastics/ glass/ stone/ leather polishing and more

Brand : OEM

OEM Latex paper

Material : Silicon Carbide

Size : 9*11 230*280mm

Application : Mainly used in automobiles, furniture, leather, home appliance shells, mechanical parts, plastics;

Grinding and polishing of ceramic glass or metal paint by hand.

Brand : RMC

RMC

Size : 9*11 230*280mm

Material : Aluminium Oxide

Application : Mainly used in automobiles, furniture, leather, home appliance shells, mechanical parts, plastics;

Grinding and polishing of ceramic glass or metal paint by hand.

Brand : Matador

Matador 991A

Material : Silicon Carbide

Size : 230mm x 280mm 9*11 inch

Application : Used for grinding and polishing wood, automobile, metal, wood, furniture, wall etc.

Brand : Eagle

Eagle

Size : 9*11 inch 230*280mm

Material : Silicon Carbide+ Latex Paper backing

Application : Widely used in machinery, automobiles, shipbuilding, furniture, decoration, metallurgy, light industry, tanning and other industries

. Used for the polishing of molds, automobiles, hulls, machine tools and other mechanical equipment and the polishing of precision instruments

. Used for fastening and polishing metal parts such as various alloy products, stainless steel products, non-ferrous metals, ferrous metal plates and impeller blades
